

MAPA

Multilingual Anonymization for Public Administrations

www.mapa-project.eu

OBJECTIVE

- Develop an open-source toolkit for effective and reliable text anonymisation in the medical and legal domains [de-identification of personal data]
- Provide the NLP tools needed for Public Administrations to be GDPR-compliant
- Enable data holders to free data that contains personally-identifiable information

TECHNOLOGIES

- BERT-based
- Word-embeddings
- Truly multilingual
- Dockerized
- Open source

MAPA IS AN OPEN SOURCE PROJECT LED BY:
